# Gourav Batra

Software Engineer | Backend & Full Stack (MERN)
+91-8290621725 | batra4336@gmail.com | GitHub | LinkedIn | Alwar, Rajasthan, India

## Professional Summary

Results-driven Software Developer with 4.7+ years of experience in backend and full-stack development using Node.js, NestJS, Express.js, Laravel, PHP, React, MySQL, MongoDB, and PostgreSQL. Strong expertise in RESTful API development, SQL query optimization, database indexing, performance tuning, JWT authentication, Role-Based Access Control (RBAC), and third-party API integrations. Experienced in building scalable web applications, database management, and backend system optimization. Familiar with Git, Docker, AWS fundamentals, and Generative AI technologies, including LLMs, LangChain, LangGraph, and Retrieval-Augmented Generation (RAG).

## Technical Skills

**Languages:** JavaScript, PHP, SQL
**Backend:** Node.js, Express.js, NestJs, Laravel, RESTful APIs, WebSockets, RBAC, System Design
**Frontend:** React.js, Next.js, Tailwind CSS, Bootstrap, EJS, HBS
**Databases:** MongoDB, MySQL, PostgreSQL, Database Design, Indexing & Query Optimization
**DevOps & Cloud:** AWS (EC2, S3), Docker, CI/CD, Git
**AI & Generative AI:** OpenAI API Integration, AI Agent Development, Python, LLMs, LangChain, LangGraph, RAG, Embeddings, Semantic Search, Prompt Engineering, Hugging Face, Ollama, ChromaDB

## Professional Experience

**Software Developer** *Oct 2025 – Sept 2026*
*Konstant Infosolutions Private Limited* Jaipur, India

- **Into Fitness (Fitness & Workout Management):** Developed a fitness application backend and admin management system to manage user profiles, exercises, workout templates, workout tracking, progress monitoring, and fitness summaries. Included administrative features for user management and workout analytics.
- **INV Management (Inventory & Production Management):** Developed an inventory and production management system to manage raw materials, stock, production processes, finished goods, dispatch operations, warehouse summaries, user management, and notifications.
- **Afuse (Community & Social Platform):** Developed a social networking and community platform with features for user profiles, community management, posts, comments, likes, connection requests, and real-time group chat functionality.
- **DesireMe (E-commerce Platform):** Developed an e-commerce platform supporting seller product listings, order management, seller earnings tracking, multilingual functionality, and payment gateway integration.
- Collaborated with project managers and clients to gather requirements, estimate sprint timelines, and deliver features within Agile delivery cycles.

**Freelance Software Developer** *Jun 2025 – Sep 2025*
*Safe Food Mitra Private Limited* Remote, India

- **EFSM (Food Safety Management Platform):** Developed platform modules for food inspection, food-safety training, verification, and application management.
- Implemented functionality for inspection records, training programs, user management, and food-safety data, including CRUD operations, input validation, database operations, and backend workflow processing.

**Software Developer** *Sep 2023 – May 2025*
*Future Profilez Private Limited* Jaipur, India

- **Tennis Khelo (Tennis & Sports Management Platform):** Contributed to sports platform functionality, including player-related features, match management, tournament workflows, and application maintenance.
- **BizzyBee (Warehouse Management System):** Worked on warehouse and inventory management modules, supporting stock tracking, inventory records, warehouse operations, and business workflows.
- **Spenny Piggy (Creator & Buyer Management Platform):** Contributed to creator and buyer management functionality, supporting user profiles, platform features, content-related workflows.
- **Bal Vishwa Bharti (School Management Website):** Worked on educational website functionality, school information, admission-related content, academic updates, and website maintenance.
- **Team Handling & Mentoring:** Guided and supported junior developers, assigned development tasks, reviewed code, helped resolve technical issues, and coordinated with team members to support timely project delivery.
- Developed and maintained web application modules, supported REST API integrations and database operations, and resolved bugs based on project requirements.

**PHP Developer** *June 2022 – Sept 2023*
*Appentus Technologies Private Limited* Jaipur, India

- Developed backend APIs and web modules using Laravel, CodeIgniter, PHP, and MySQL.
- Implemented authentication, notifications, payment integration, and e-commerce modules.
- Resolved production issues, performed debugging, and maintained critical application functionality.

**Web Developer Intern** *Jan 2022 – Jun 2022*
*Iskylar Technologies Private Limited* Jaipur, India

- Developed modules for Laravel-based enterprise applications; gained hands-on experience in MVC architecture, backend development practices, and team-based software delivery.

## AI Projects

**AI Resume Screening System**

- Developed an AI-powered resume screening system using Python, LangChain, ChromaDB, Ollama, and Streamlit with semantic search and vector embeddings.

**Multi-PDF RAG Chatbot**

- Built an RAG chatbot for querying multiple PDFs using document chunking, vector embeddings, and semantic retrieval.

## Education

**Mangalayatan University** July 2024 – August 2026
Master of Computer Applications (MCA) Aligarh, Uttar Pradesh

**Presidency College, Matsya University** August 2020 – May 2023
Bachelor of Commerce (B.Com) Alwar, Rajasthan

**DIIT Educom (IT Training)** January 2021 – January 2022
Diploma in Web Profession Alwar, Rajasthan
